

ESG Testing Report

perm_id: 5054883975			
industry: Semiconductors			
framework: SASB Semiconductors			
year: 2017			
items:			
category:	Energy Management in Manufacturing		
	metric: Percentage Grid Electricity		
	modelDisplay: Grid Electricity Rate Model		
	value: 26.142105775920786		
	method: calculation_model		
	methodDetails:		
	calc:	calculationType:	models/percentage_ratio.py
		modelExecution:	models/percentage_ratio.py.py
		formula:	(grid_electricity / total_energy) * 100
		inputs:	- Grid Electricity - Total Energy
	metricInfo:		
	metric_name: ELECTRICITYPURCHASED		
	value: 984049.2		
	metric_type: float		
	unit: GJ		
	description: Electricity purchased in gigajoules.		
	provider: Clarity AI		
	source: Semiconductors Eurofidai Environment Dataset		
	metric_name: ENERGYUSETOTAL		
	value: 3764230.81		
	metric_type: float		
	unit: GJ		
	description: Total energy consumed by a company within its operational control, including energy produced and purchased (e.g., electricity, steam, natural gas, coal, oil).		
	provider: Clarity AI		
	source: Semiconductors Eurofidai Environment Dataset		
	pillar: E		
	category: Greenhouse Gas Emissions		
	metric: GrossGlobalScope1Emissions		
	modelDisplay: direct_measurement		
	value: 37047		
	method: direct_measurement		

methodDetails:	direct:	obtainedFrom:	CO2DIRECTSCOPE1
		source:	Commercial Banks Eurofidai Environment Dataset
		reported_date:	2017-12-31 00:00:00
		pillar:	E
